Profile

I studied Systems Analysis at Universidad ORT and have been working as a Frontend Developer and UX/UI Designer for the past 7 years.
I have strong experience with React, Next.js, and TypeScript, combining technical skills with a deep focus on modern, accessible, and user-centered interface design.
I master prototyping and design tools like Figma and Miro, complemented by advanced knowledge of frontend development.
My goal is to create digital experiences that are visually appealing, functional, and impactful.

Work Experience

2014 - 2017
Zenda JBS | Montevideo

Technical Support

- Maintained and repaired IT equipment, resolving software and hardware incidents.
- Provided support for the Zenda Uruguay website, ensuring operational continuity.
- Assisted internal users and ensured efficient system performance.

September 2017 — Present
Antel | Montevideo

Frontend Developer | UX/UI Designer — Antel TV

- Developed and maintained web projects using React and Next.js, focused on performance, scalability, and accessibility.
- Designed and implemented UI/UX improvements to enhance user experience and visual quality.
- Integrated APIs and optimized processes for a nationwide streaming platform.
- Collaborated with multidisciplinary teams to ensure both functional and visual consistency across the product.
